With a history that dates back 100 years, IMEG grew from several firms coming together under one unifying vision: people-centered engineering. As a national engineering and design consulting company we've intentionally localized our focus to serve carefully chosen regions and markets, allowing us to put relationships and communities first, without sacrificing expertise.

Our specialties are high-performing building systems, infrastructure, program management and construction-related services, but our secret to success is found in our deep bench of nearly 1,300 team members and challenging ourselves to be thought leaders in the A/E/C industry.

IMEG has engineered healthcare facilities for more than 60 years. Our goal has been to provide **exceedingly high patient and user satisfaction**. We are healthcare specialists who do engineering, and our market-focused engineers, services and disciplines reflect our commitment to healthcare. We understand reliability, flexibility, energy efficiency and safety requirements. From certified Healthcare Design Professionals to Lean Six Sigma, we offer the expertise and flexibility to produce customized solutions and deliverables. The healthcare market accounts for more than 35 percent of our practice. **We have served more than 550 healthcare clients and have completed over 5,000 projects totaling more than \$75.5 billion in construction.**
