

Ghafari Associates is currently looking for a Project Architect/PM with healthcare project experience to lead healthcare renovation, expansion, and new construction projects for hospitals, ambulatory facilities, and other and medical facilities in our Grand Rapids, MI office or our Dearborn, MI office.

Interested Candidates should have experience with:

- Project Architecture/Management from concept to completion
- Leading the technical direction of a project team and their progress with construction documents, work sets and specifications
- Responding to RFI's, client requests and changes; reviewing drawings; issuing bulletins; and other duties related to in-house construction administration

Requirements for this position include:

- Bachelor's degree in Architecture or Architectural Engineering; Master's preferred
- Registered Architect License
- Previous experience with healthcare related projects (hospitals, clinics, medical facilities)
- At least 7 years of experience in Architecture
- LEED accreditation preferred but not required

Technical Requirements for this position include:

- Proficiency in Revit is preferred
- Intermediate proficiency in AutoCAD, Navisworks, Adobe products
- Familiarity with IPD, Lean, ProjectWise, and Last Planner a plus but not required
